BR 628

Cab setup

- Keys in and brake cut-off to Ein (PARK BRK up), battery on in the cab
- Handbrake released; if the valve will not leave Running, flip PARK BRK down and up (cut-off Aus locks it there)
- Engines Gruppe 1 and 2 started, transmission on, in the cab
- SiFa and PZB fuses on (aux squares lit)
- Führerbremsventil at Full service
- Lights to Headlights

Cleared to depart

- Close doors, check the signal and PZB
- Richtungsschalter to V
- Brake to Running and wait for the pipe to charge
- Fahrschalter up in notches 1 to 7
- Acknowledge SiFa with the gear lever, PZB with the ENG switches
- Brake: Min, then service steps 1 to 9 towards Full service; Lap holds the pressure
