ES 64 U2

Cab setup

- Battery on in the cab, parking brake released
- Richtungsschalter from Off (the key position) to Neutral
- RUD TRIM left raises the pantograph, right closes the Hauptschalter
- SiFa and PZB on (aux squares), PZB mode and brake selector set in the cab
- Lights (AUTO BRK)
- AFB on (PARK BRK up) if you drive with the speed setter

Cleared to depart

- Check the signal and PZB
- Richtungsschalter to Forward
- Führerbremsventil to Running, wait for the brakes to release
- Fahrschalter towards Max, or set the AFB speed on the flap lever
- Acknowledge SiFa with the gear lever, PZB with the ENG switches
- Brake: Führerbremsventil in steps; the E-brake lever stays in the cab
