BR 612

Cab setup

- Reverser key and brake key in (PARK BRK); battery, engine groups 1 and 2 and the transmission on in the cab
- Richtungsschalter from Off to Forwards
- SiFa and PZB on (aux squares), GNT fuse and PZB mode in the cab
- Lights to Headlights
- Fahr-/Bremshebel in Off (centre band); no AFB, the flap lever is free
- Open the doors (RUD TRIM, hold the side you need)

Cleared to depart

- Close doors (release RUD TRIM), check the signal and PZB
- Führerbremsventil to Running, wait for the brakes to release
- Push the handle to Throttle + to raise power, back one band to Throttle hold to keep it
- Acknowledge SiFa with the gear lever, PZB with the ENG switches
- Slow down: handle back past Off to Brake + (pulse) and Brake hold, or the Führerbremsventil in steps
- Stop: Führerbremsventil to Full service, handle to Off
