Bpmmbdzf

Cab setup

- Reverser key and brake key in (PARK BRK), battery on in the cab
- Richtungsschalter from Off to Neutral
- Raise the pantograph and close the Hauptschalter of the pushing BR 101 from the cab
- SiFa and PZB on (aux squares), PZB mode set
- Lights to Signal lights or Headlights
- Open the doors (RUD TRIM); the cab car has no AFB, so the flap lever is free

Cleared to depart

- Close doors, check the signal and PZB
- Richtungsschalter to Forward
- Führerbremsventil to Running, wait for the brakes to release
- Fahrschalter towards Z: the loco pushes
- Acknowledge SiFa with the gear lever, PZB with the ENG switches
- Brake: Führerbremsventil towards SB in steps
