SCOTRAIL · DOVETAIL GAMES · TCA QUADRANT AIRBUS

Class 380

Cab setup

- Master key in (PARK BRK)
- Pantograph up (right throttle button), wait for line volts
- Direction switch to Neutral
- TPWS/AWS and DVD isolation off (aux squares): a service starts with both isolated
- Exterior lights to Day
- Open doors (RUD TRIM)

Cleared to depart

- Close doors, wait for the guard bell
- Check the signal, DRA off
- Direction switch to Forward
- Handle from Max brake through Off into power
- Pull further as speed rises
- Acknowledge AWS with the gear lever
