

BR 193 Vectron

Cab setup

- Battery to Ready in the cab, parking brake released
- PARK BRK up: master key in, Führerbremssventil cut in
- Raise the pantograph, close the Hauptschalter in the cab
- SiFa and PZB on (aux squares): a service starts with both isolated
- Lights (AUTO BRK), brake selector G / P / R in the cab
- AFB: RUD TRIM left on, speed on the flap lever, RUD TRIM right confirms

Cleared to depart

- Check the signal and PZB
- Richtungsschalter to Forward
- Führerbremssventil to Running, wait for the brakes to release
- Fahr-/Bremsschalter towards power, or set and confirm the AFB speed
- Acknowledge SiFa with the gear lever, PZB with the ENG switches
- Brake: handle towards E-brake, Führerbremssventil in steps
