Class 08

Cab setup

- PARK BRK up: master key switch On; brake selector and battery in the cab
- Start the engine (right throttle button)
- Reverser from Off to Forward: the power handle only moves then
- Check the DSD isolation light is out
- Lights to Markers
- Loco brake at Full, vacuum brake at Full (parked)

Cleared to depart

- Check the signal and the shunter
- Vacuum brake to Release, loco brake to Release
- Power handle 1 to 4 (only with the reverser in Forward)
- Deadman: acknowledge with the gear lever if the game asks
- Brake: power Off, vacuum brake towards Full, or the loco brake light engine
- Change direction: power Off first, then the reverser
