CAB TESTED LONDON NORTHWESTERN RAILWAY · DOVETAIL GAMES · TCA QUADRANT AIRBUS

Class 350

Cab setup

- Master key in (PARK BRK)
- Close the cab door behind you (Close doors leaves it open)
- Reverser to Neutral
- Cold train only: battery on, AC traction selected, then hold the yellow pantograph switch left until the line volts show
- Check TPWS/AWS and DVD isolation lights are out
- Headlights to Day
- Open doors (RUD TRIM)

Cleared to depart

- Close doors, wait for the guard buzzer
- Check the signal, DRA off (right throttle button)
- Reverser to Forward
- Handle from Max brake through Off to the first power step (about 10 % power, the train moves off)
- Pull further into the power zone as speed rises
- Acknowledge AWS with the gear lever
