NS SNG

Cab setup

- Insert master key (PARK BRK)
- Handle fully back at Max brake (right throttle)
- ATB / ERTMS and deadman cut-outs in (aux squares)
- Signal lights On (AUTO BRK), intensity on the flap lever
- Release the parking brake (right throttle button)
- Unlock the doors

Cleared to depart

- Close doors
- Check signal and ATB
- Reverser to Forward
- Handle forward through min brake to 0, then 5 % and continuous power
- Brake: back past 0 into min brake, continuous to Max brake
- Stop board: SNG cars are short, so a 6-car SNG stops at board 5 (DTG)
