# MP36PH-3C

## Cab setup

- PARK BRK up: reverser handle in, brake valve cut in, engine run / generator field / control switches on (the loco loads with them off); MU-2A valve to Lead and HEP to Run in the cab
- Reverser from Neutral to Forward; alerter breaker on (left aux lit)
- Lights to Bright, ditch lights on
- Independent at Full, automatic brake at Full service (parked); handle at Idle

## Cleared to depart

- Check the signal; bell on (ENG 1)
- Automatic brake to Release, independent to Release (ENG 2 up to bail off)
- Handle away from you: P1 … P8
- Reset the alerter with the gear lever
- Brake: handle back through Idle and Setup into the dynamic notches; automatic brake into the service zone for the stop, Emergency at the far end
