PARK BRK

Master key + brake cut-in
flat = off · rotate up = on

● recommended starting position

Cab setup

- PARK BRK up: master key to Master, brakes cut in (the railcar loads with the key Off and the brakes cut out)
- Engines: reverser to Engine only, ENG 1 up until they run (most services start with them running)
- LS90 on (left aux lit); it loads isolated
- Lights to Head full
- Independent at Applied, handle at V

Cleared to depart

- Close the doors (RUD TRIM again), check the signal; reverser to Forward
- Independent to Released
- Handle: tap into S and back to J to build power step by step; J holds it, V coasts
- Acknowledge vigilance with the gear lever
- Brake: tap into BE (dynamic) or BP (air) and back to V, which holds the brake; J releases it; R emergency nearest you
