Class 40

Cab setup

- Battery switch closed in the cab (a scenario starts cold)
- Master key and brake key in (PARK BRK up)
- Reverser to Engine only, start the engine (right throttle button)
- AWS isolation light out
- Front marker lamps on (AUTO BRK)
- Release the handbrake in the cab

Cleared to depart

- Check the signal
- Train brake to Running, wait for the pipe to charge
- Reverser to Forward
- Loco brake to Release (flap lever away)
- Power controller to On, then open up slowly
- Acknowledge AWS with the gear lever
- Power controller to Off before moving the reverser back
