● recommended starting position

Cab setup

- Master key in (PARK BRK)
- Master control switch from Shutdown to Secure, then Forward when ready
- Pantograph up (right throttle button) under the wires
- Check TPWS/AWS and DSD isolation lights are out
- Headlights to Day
- Open doors (RUD TRIM)

Cleared to depart

- Close doors, wait for the signal buzzer
- Check the signal
- Master control switch to Forward
- Handle from Max brake up to Coast
- Push into the traction zone, more as speed rises
- Acknowledge AWS with the gear lever
