Class 86

Cab setup

- Master key and brake key in (PARK BRK)
- Pantograph up (right throttle button), wait for line volts
- Check AWS isolation and DSD breaker lights are out
- Lights to Head + markers, tail lights off
- Release the parking brake in the cab
- Train brake to Full service; service zone is continuous between 1st application and Full service

Cleared to depart

- Doors closed (RUD TRIM), wait for the guard buzzer
- Check the signal
- Reverser to Forward (Reverse needs the lock button in the cab)
- Train brake to Running, loco brake released
- Power controller to Notch up, back to Hold at the wanted tap; Run down / Notch down to shed power
- Acknowledge AWS with the gear lever
