F7

Cab setup

- PARK BRK up: reverser handle in, generator field on, brake valve cut in (a spawned loco loads with them off)
- Reverser from Neutral to Forward; safety control cock cut in (left aux lit)
- Lights to Bright
- Independent applied (round aux lit), 24RL brake at Service (parked); throttle Idle, transition Off

Cleared to depart

- Check the signal; bell on (ENG 1)
- 24RL brake to Running; round aux out to release the independent
- Transition lever to Series parallel (throttle at Idle), then throttle notch by notch; SP shunt at speed
- Deadman pedal on the gear lever when it calls
- Brake: throttle to Idle, transition to Braking and throttle up for dynamic braking; 24RL to First service or Service, Lap to hold; Emergency at the far end
