Thomas

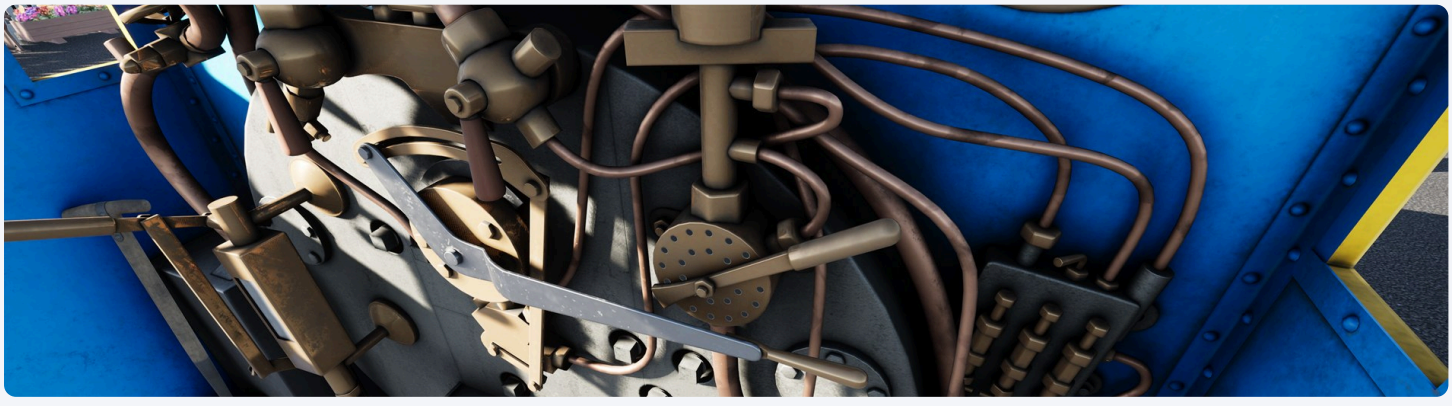

Cab setup

- Thomas drives on simple controls: one spring-loaded handle for power and brake, no fireman duties; the backhead is decoration
- Reverser to Forward (speedbrake lever) at a stand
- Headlights on (round aux)

Cleared to depart

- Close doors (RUD TRIM), check the signal
- Move the left lever into the power zone; the handle only acts while the lever moves or ENG 1 (power hold) is up
- The train coasts when nothing is sent; brake with the lever past 0 or with ENG 2 (brake hold) up
- Whistle on the right throttle button
